

Canada Larga Road 11-year update

Date: 2024

Location: Ventura, CA

Advantage: Extended
Pavement Life,
Reduced Cracking

FORTA**fi**ed[®]

2024

Technical Specifications

Fiber Reinforcement: FORTA-FI[®]

Overlay Thickness: 2"

Additives: Rubberized Asphalt

A two-mile segment of the two-lane, rural Canada Larga Road in Ventura County, CA was in bad shape after 30 years of use with no major rehabilitation. **When it came time to lay new pavement, a 2" rubberized asphalt overlay reinforced with FORTA-FI was chosen for one mile and a 2" rubberized overlay with no fiber was chosen for the second mile.**

UPDATE

After 11 years this roadway still shows little signs of cracking on the **FORTA**fi**ed[™]** side and will continue to remain **Stronger Lasting** for many years to come.
