

22nd Street Overlay

Date: 2017

Location: Greeley, CO

Advantage: Pavement Life

Distributor

**PACIFIC
GEOSOURCE**

Technical Specifications

Fiber: FORTA-FI[®]

Total Project Size: 2,500 Tons

Application: Resurfacing

Design: 4" - 5" Grind

Overlay Thickness: 2" Conventional Asphalt
2" FORTA-FI Top Lift

Addition Method: FORTA[®] Voyager Fiber Feeder

Plant Type: Drum

The City of Greeley chose **FORTA-FI** to reinforce their 22nd Street overlay project. The **FORTA Voyager** fiber feeder was used to seamlessly introduce **FORTA-FI** into the plant mixing process, requiring just one operator and **zero changes to the plant's equipment**. The use of the Voyager allowed the operator to easily program the fiber feed rate to match the plant's asphalt production rate. Plant workers also commented on the **easy set up** for the Voyager and its **extreme accuracy**.
