

## State Route 15

**Date:** 2023

**Location:** Palm Beach County, FL

**Advantage:** Pavement Life

### Technical Specifications

**Fiber Reinforcement:** FORTA-FI<sup>®</sup>

**Application:** Mill & Fill

**Total Project Size:** 2,100 tons

**Overlay Thickness:** 2-3 ½" Structural Layer,  
1 ½" Friction Layer

**Delivery Method:** Voyager

This control vs. fiber project for the Florida Department of Transportation (FDOT) placed fibers in both the base and wearing courses. On-site personnel were very pleased with **FORTA Voyager's** performance at the plant and did not experience clumping issues at the job site. Over the next few years, FDOT will evaluate the project to analyze the **extended pavement life** cycle provided by **FORTA-FI** reinforcement fibers.
