

**Convenience Store –  
 Hummelstown**  
 7-year update

**Date:** 2016

**Location:**

Hummelstown, PA

**Advantage:**

Cost Effective

2023

**Technical Specifications**

**Application:** Direct Overlay

**Fiber Reinforcement:** FORTA-FI<sup>®</sup>

**Total Project Size:** 400 tons

**Plant Type:** Batch Plant

**Asphalt Grade:** PG 64-22

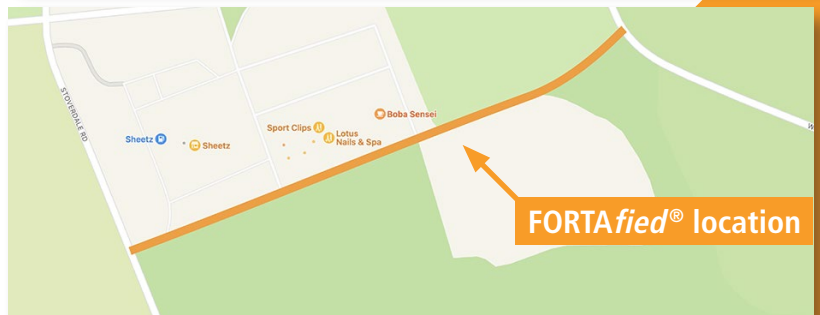

Using FORTA-FI in asphalt mixtures provides **longer-lasting pavement life** and **decreases costs**. This test project utilized FORTA-FI on this access road used for truck deliveries. The road needs to withstand slow-moving and turning heavy truck traffic. FORTA-FI will reinforce the access road making it **stronger and more durable** than compared to conventional design.

**UPDATE**

**After seven years**, this project has remained free from the rutting, raveling, and cracking you would see using traditional asphalt pavements.
